EXHIBIT A Project description and budget

Campaign about asthma in children

An action-oriented information campaign that aims to provide knowledge, hope, and options for families with children who are severely affected by asthma. With the campaign, we want to give families an overview of all the help available for their child. We will guide them through the treatment system, and we will show them possible solutions for what they can do to help their child gain control over asthma, so they can hopefully live the life they dream of.

Purpose: We want to spread knowledge, hope, and options among families with children who are severely affected by asthma.

Message: Your child can get help to live a life where asthma does not stand in the way of childhood.

Target group: Parents of children who are severely affected by asthma.

The campaign aims to show parents of children who are severely affected by asthma what it means to be well-treated and what options they have to help their child gain control over asthma if they are not there today. The goal of the campaign is to help children and their families live a normal life, even though they are severely affected by asthma.

- **Knowledge:** They need to know what (severe) asthma is. They need to understand the underlying causes of the disease. They need to understand why treatment is the right help. And they need to know about the related diseases that can go 'hand in hand' with asthma.
- **Hope:** They need to know what it means to be well-treated and understand that with the right treatment, it is possible for their child to live a life without breathing difficulties and related diseases.
- **Options:** They need to know where they can seek help for a holistic treatment if their child, despite treatment, is still limited by their asthma or related diseases.

The campaign consists of:
